

Tractor & Equipment Enamel Reducer

R-05 is formulated as a VOC-exempt reducer for Van Sickle Tractor, Equipment & Industrial Enamel. This fast dry reducer contributes better flow and brushing properties when used as recommended.

For best results, add one pint of R-05 Enamel Reducer per gallon of Van Sickle Tractor & Equipment Enamel. Stir thoroughly. Use an airless sprayer with a minimum pressure of 1,200 PSI. When using this Reducer with Clear Hardener, incorporate the hardener first as directed on the label. R-05 may also be used with Van Sickle Tractor & Equipment Enamel Primer.

The Perfect System

- R-05 is formulated as a VOC-exempt reducer for Van Sickle Tractor, Equipment & Industrial Enamel.
- When used with our 7019 Clear Hardener/Catalyst, the two make a perfect system to increase durability, chemical resistance, and to improve gloss and long-term gloss retention without compromising the VOC limits of the product.
- Mixing one pint of the reducer per gallon of Van Sickle Tractor, Equipment & Industrial Enamel will achieve the perfect spray consistency for most spray equipment.
