7300 BLUE MOON

Cool colors remind us of ice, water and leaves. They include colors such as greens, blues and blue violets. They also include the neutral grays in each of those families. Cool colors are calming and relaxing in the lighter, softer versions and can be dramatic and bold in the deeper, brighter versions.

Choosing COLORS - Helping you create an attractive home

is what we are all about. That's why we've put together this color card.

We've consulted with several leading decorators to help you select an attractive color scheme. Their best ideas are the color combinations you see in this card.

Here are some helpful hints for using this Cool Colors Card

1. WALL COLOR:

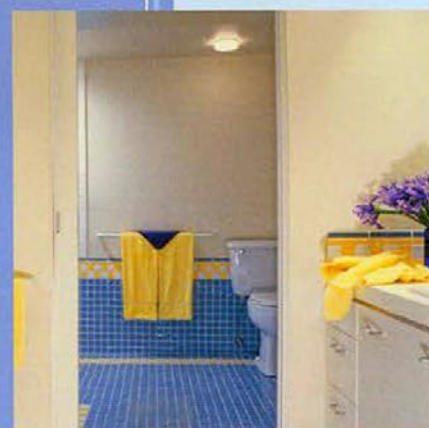

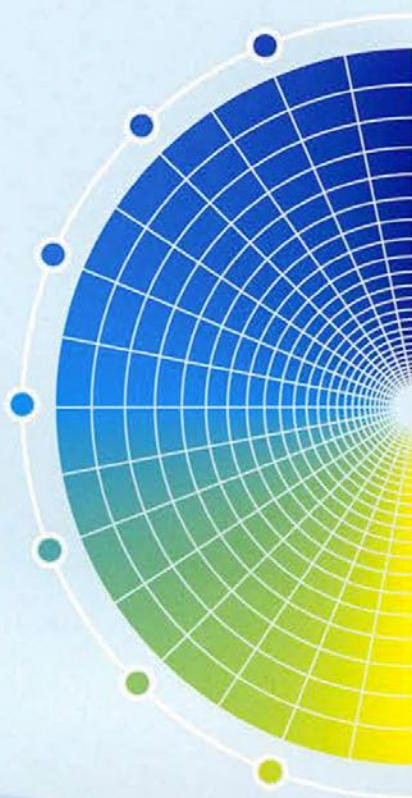

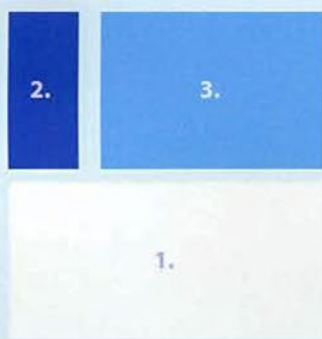

You can't go wrong selecting a light or medium color for the main wall color of the room. You can fine tune your selection with the help of our Colorizer in store color selector.

2. TRIM COLOR:

A coordinating color will usually be darker than the wall color. Don't be afraid to use your imagination. You can reverse the wall and trim colors, if you prefer. Use some creativity to mix-n-match colors so that your home's interior will reflect your own personal style.

3. ACCENT COLOR:

A popular look today includes a third color to highlight or accentuate different architectural details of the home's interior, such as moldings, mantle pieces, and cabinet trim.

Cool colors Range

find your personality color

Some tips on color:

Consider parts of the rooms that will not or cannot be painted. For example, the furniture, tile work, and rock work around fireplaces. Also, carpeting and floor coverings, will affect the overall look of the finished room. You want a comfortable look, the end result being a room you enjoy spending time in.

Choosing the right type of paint:

We have several types of paint for different surfaces and conditions. Our professionals can recommend the proper coating for your particular situation, plus offer helpful advice on preparation and application for a lasting, great looking paint job.

Free color cards and chips:

Color cards, such as this Cool Colors Card, are available at no charge. You also can select from the complete range of colors available in the chip rack display. Take some samples with you to see how they look in the comfort of your own home.

Get inspired:

Consider other interiors you may have seen, or go through decorating magazines and fashion books to get ideas. You want your interior to be distinctive as well as friendly and memorable to all your guests. White may be right for some classical homes, but don't be afraid to express your own good taste with a distinctive color scheme.

Color Matching:

Our paint professionals are "Masters of the mix" and can match literally any color you have in mind. Simply bring in a sample of the color; it can be a piece of fabric, wood, actual paint, even a competitor's paint chip and we'll match the color.

We know paint:

We have a full selection of architectural coatings to protect and decorate your home along with many specialty coatings. As one of the leading suppliers to manufacturing and industrial coatings users, we can find the most suitable paint for your project – be it a bedroom or a bulldozer.
