## SELECTING EXTERIOR COLORS

- Consider features and details of the exterior that you will not or cannot paint. The color of your roof along with brick and rock details affect the look of your house. Be mindful of these when selecting a color. You want to develop a final color palette that delivers a unified look with curb appeal.
- Study neighboring homes. A compatible, but distinctive color scheme is the goal.
- Get inspired. Look at other houses you like, take pictures or study shelter magazines to get ideas.
